

dinomachine.ru

About production

Large room

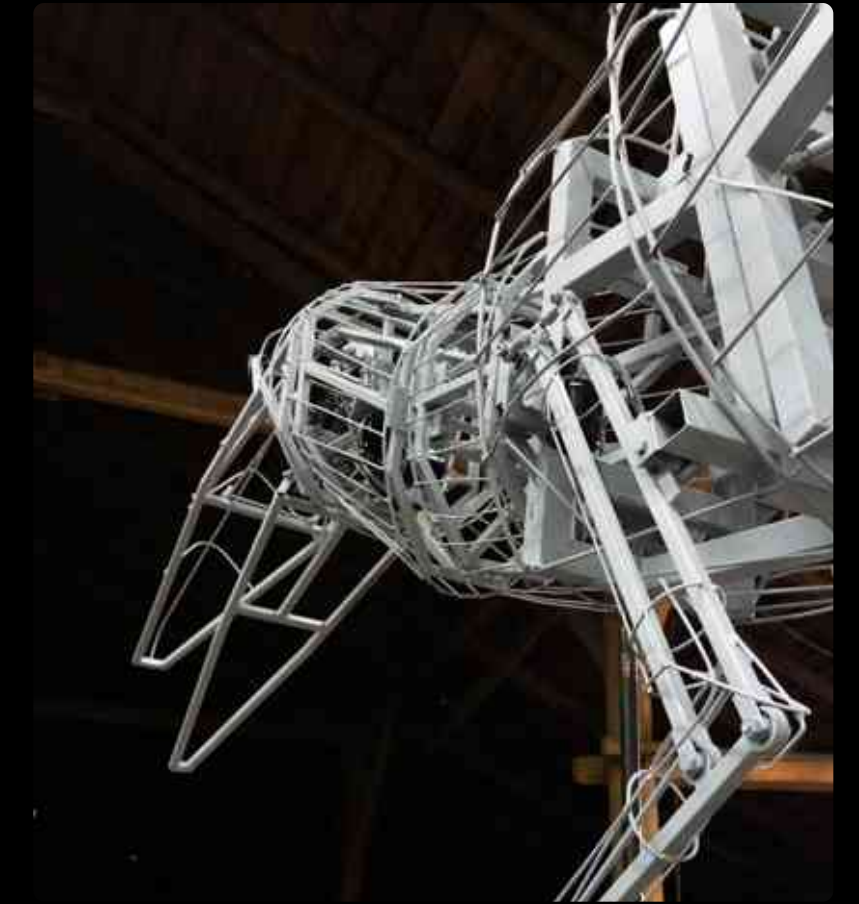

The total area of the production premises is more than 500 m2, which means that we can produce and store many figures and props from small up to huge ones, more than 12 meters high.

Quality materials and equipment

We use the best materials and raw materials, so the figures in your park will easily survive dry hot summers and cold snowy winters.

Command

Our team consists of only real professionals who like to work with the most unusual projects.

Clash of two Triceratops

dinomachine.ru

Triceratops

The animatronic figure includes several movements:

- Opening and closing the mouth with synchronous sound
- Opening and closing the eyelids
- Turning the head left-right
- Neck moves up and down
- The abdomen mimics breathing
- The tail moves left-right

Figure price
